

Silica-supported iron oxide nanoparticles: unexpected catalytic activity in hydrogenation of phenylacetylene

Anastasiya A. Shesterkina, Elena V. Shuvalova, Elena A. Redina, Olga A. Kirichenko, Olga P. Tkachenko, Igor V. Mishin and Leonid M. Kustov

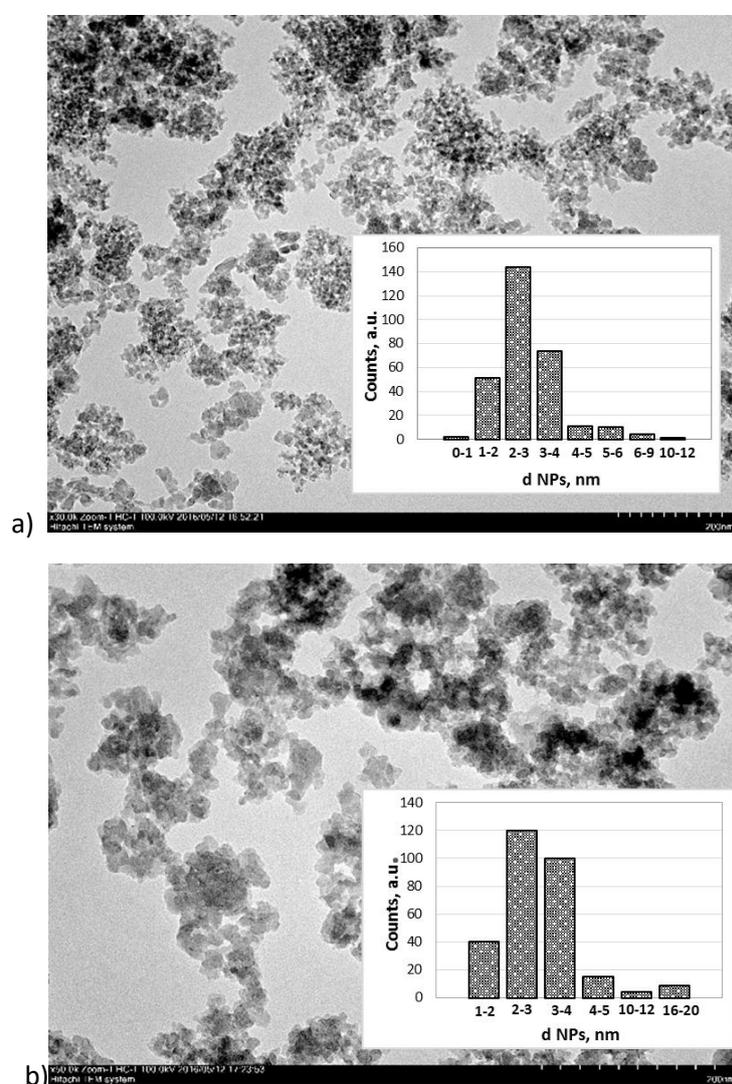

Figure S1 TEM images and the particle size distribution for the FeO_x/HS sample calcined at (a) 250 °C and (b) 350 °C.
